organizes

Offline workshop on

Date: December 2nd, 2024 | Time: 11.00 am to 05.00 pm

About the workshop

The workshop on Effective Search Techniques aims to enhance the information search literacy of doctoral students. Participants will learn how to navigate academic databases and search engines efficiently, employing strategies like Boolean operators, filters, and controlled vocabularies to refine search results. The session will also cover keyword selection, subject headings, and advanced features, fields search and proximity operators. The workshop will also explore setting up email alerts for tracking the latest updates on relevant topics and tips for evaluating search results critically to ensure credibility and relevance. This hands-on session is tailored to enhance efficiency in navigating vast digital resources for academic research.

Note:

- e-Certificate will be provided only in the registered participants' names who will attend the workshop.
- While registering type your name exactly as it should appear on your certificate.
- Fee is not refundable.
- Workshop kit includes course material excluding lunch.
