## ABOUT THE WORKSHOP

In survey research method, a questionnaire has often been used as a crucial tool to systematically collect both quantitative and qualitative data from large populations. Careful design of questionnaires is vital because it ensures the accuracy, reliability, and validity of the data collected. It aids in the clear interpretation of results, facilitating meaningful analysis and robust conclusions, thereby making the research more credible and valuable. A well-designed questionnaire ensures that the questions align with the research goals, providing clear and specific data that can be analysed to draw meaningful conclusions. Designing a questionnaire involves common problems such as ambiguity and vagueness, leading and biased, and complex or lengthy questions. Proper training helps in understanding how to formulate clear, unbiased, and relevant questions that align with the research objectives. In view of this, a two-days training program on "**Mastering Questionnaire Design**" including theory and practice will be conducted for students, researchers, and teachers.

### Objectives of the workshop

- Understand the Fundamentals of Questionnaire Design
- Differentiate and Utilize Various Question Types
- Structure Questionnaires for Optimal Data Collection
- Pilot and Revise Questionnaires
- Apply Practical Skills in Questionnaire Design

## RESOURCE PERSON

**Dashrath Basannar**  
**Scientist 'F' (Retd), AFMC, Pune**

Dashrath Basannar sir has 32 years of experience as a scientist at AFMC, Pune. He has an insightful teaching experience in questionnaire designing & evaluation and data management. He developed a software package for training in Clinical Research Methodology under the AFMRC project. He received reviewer recognition award for Medical Journal Armed Forces India in 2012, 2016, 2021 & 2023, DGAFMS & SR COL COMDT award in 2016 and WHO fellowship in 2017.

### Workshop Coordinators

- Dr. Shubhada Nagarkar, CPE
- Dr. Girish Tillu, CCIH

**Number of Seats: 30**  
**(First come first serve basis)**

Research students and Faculty members of Social Science, Arts & Humanities and Interdisciplinary Studies disciplines.

**Workshop Fee: 2000/-**

**Registration Start Date:** 2<sup>nd</sup> July, 2024

**Last Date of Registration:** 9<sup>th</sup> July, 2024
